

ltxcheck: The L^AT_EX test program*

David Carlisle

2004/02/11

This file, `ltxcheck.tex` should be run after L^AT_EX has been installed. It Checks some system dependent parts of L^AT_EX are set up correctly for your system, and checks that the main input files and fonts that L^AT_EX uses are present and can be found by L^AT_EX.

```
1 \makeatletter
2 \typeout{^^J%

465 You may want to run ec.ins and remake the LaTeX format}
466 \fi
467 \fi
468 \pause

```

The following files will be unpacked by running iniTeX on unpack.ins.

```

469 \typeout{^^JChecking LaTeX input files...^^J}

```

If the specified file is not there, add it to the list.

```

470 \def\checkfile#1{%
471 \IfFileExists{#1}{\edef\missingfile{\missingfile#1, }}}

```

Report any missing files in the last batch tested.

```

472 \def\filereport#1#2{%
473 \ifx\missingfile\@empty
474 \typeout{^^J%
475 OK: The #1 files such as #2^^J%
476 are accessible to LaTeX.}
477 \pause
478 \expandafter\@gobbletwo
479 \else
480 \typeout{^^J%
481 ! BAD: The #1 files:^^J%
482 \missingfile^^J%
483 are not accessible to LaTeX.}
484 \errhelp{Check the installation!}
485 \let\missingfile\@empty
486 \fi

```

```
487 \errmessage{Missing LaTeX files}}
```

Kernel files:

```
488 \let\missingfile\@empty
489 \checkfile{hyphen.ltx}
490 \checkfile{fontmath.ltx}
491 \checkfile{fonttext.ltx}
492 \checkfile{preload.ltx}
493 \checkfile{texsys.cfg}
494 \checkfile{latex.ltx}
```

Don't use `\filereport` here as the message is rather different as the `.ltx` files don't really need to be available to \LaTeX once the format is made.

```
495 \ifx\missingfile\@empty
496   \typeout{^^J%
497 OK: The files such as latex.ltx that are used to make^^J%
498 the format are accessible to LaTeX.}
499 \else
500   \typeout{^^J%
501 The files:^^J%
502 \missingfile^^J%
503 that are used to make the format are not accessible to LaTeX.^^J%
504 This is OK, but you will need those files if you need to remake the^^J%
505 the format later.}
506 \fi
507 \pause
508 \let\missingfile\@empty
```
